

Update - This is Jim from Sunday's 7:30 service. (prayed for my arthritis in my left knee). Since Sunday I've had no pain in my left knee in fact I actually have been able to work out.

I like to talk, I like to share but not about myself. But here it is - I've had arthritis in my knees for many years and it's gotten progressively worse, until Sunday. It got to where I would come home from work and not get off the couch. And I'd toss and turn all night from the pain. Then get up and try to sleep on the couch with my leg propped up to reduce the pain.

Sunday and Monday night I didn't sleep real well because (subconsciously) I kept expecting my knee to hurt but it never did! Now at night I sleep like a baby - the pain is gone - no worrying.

Praise God!

\*Jim gave his testimony the following Sunday during our 7:30am service. He shared that before church started he wanted to make sure that his arthritis was really gone, so he got up on our sea wall and jumped off several times. NO PAIN! 😊

God healed two other people of arthritis that same Sunday in very similar ways. One lady had severe arthritis in her knees, shoulders, and spine. She was prayed for Sunday morning by the church body, slept poorly that night, but woke up the next morning completely pain free. For the next week she expected the pain to return, but it never did. Praise God! She's completely healed to this day.
